- JS/TS
- React/Redux
- Responsive Design
- CMS
- Hosting Setup
- UX Improvement
- GIT
- HTML/HTML5
- CSS/SCSS
- Storybook
- UI-Kit
- Lighthouse Audits/Lazy Loading

## WORK EXPERIENCE

### FRONT-END/UI-REACT DEVELOPER Jan 2021 - Oct 2024

*AirSlate*

#### Key Achievements:

- Played a key role in two major transitions: moving from Pug to React and from React to a functional UI Kit for product teams that led to 30% workload decrease;
- Automated processes, reducing manual work by 10% and improving efficiency, especially through icon export (2000 icons were automated) and ESLint integration;
- Refactored 30% of legacy code, improving performance and maintainability;
- Standardized Storybook documentation and collaborated with cross-functional teams to present and introduce UI Kit components, ensuring smooth adoption across departments.

#### Responsibilities:

- Worked on the migration of components from Pug to React and transitioned React components to functional ones as part of building a new UI Kit that united layout and system design for 8 commands from scratch;
- Configured Storybook to streamline development processes leading to consistency in code and reducing the manual work by 10%;
- Successfully led cross-team communications and negotiations with front-end developers and designers;
- Developed and maintained React components based on design mockups to meet product needs;
- Automated workflows, including filtering props, exporting icons from Figma, and integrating ESLint to improve code quality.

### UI DEVELOPER Feb 2020 - Dec 2020

*WebEnergy-it*

#### Key Achievements:

- Built responsive, high-performance layouts and Optimized UI rendering, reducing first-contentful paint time by 20%;
- Rewrote websites code in real time that allowed companies not to interrupt work of websites for 2 weeks;
- Improved SEO rankings through accessibility and performance optimization;
- Implemented new blocks for enhanced CMS functionality and creating layouts more modular and reusable.

#### Responsibilities:

- Developed adaptive and responsive interfaces with SCSS, focusing on modularity and flexibility;

- CI/CD
- Webpack/Gulp
- WCAG
- Figma, Adobe XD, Sketch
- GSAP

## LANGUAGES

**Russian**, Native

**English**, Intermediate (B1)

**Ukrainian**, Upper intermediate (B2)

- Identified the elements that slowed down rendering on some devices using Light House and Speed Inside;
- Designed layouts for CMS, organized content and product catalogs, and optimized sites for SEO and performance;
- Created a website from scratch using WordPress;
- Optimized website for mobile phones;
- Used animations and ScrollSmoother.

## WEB DEVELOPER Mar 2019 - Mar 2020

### Freelance

- Created a feature to automatically identify client's geo to calculate the cost of delivery based on delivery zone;
- Created Internet stores, landing pages; performed sites redesign, optimization and debugging;
- Created designs and landing layouts on CMS;
- Wrote additional functionality/modules;
- Set up hosting, debugging, and SEO optimization for small business clients;
- Communicated and collaborated with customers, making sure to follow all client's requirements.
